Senior full stack engineer with 5+ years building enterprise systems in Java, Spring Boot and Quarkus. Worked on QWControl, a commercial workload automation platform that competes with Control-M, and now delivers APIs and microservices for CASSI at Stefanini. Uses Claude Code, Codex and MCP in development.

professional experience

Stefanini Group - CASSI **Nov 2024 - Present**

Senior Full Stack Developer Remote

Client: CASSI, the health plan of Banco do Brasil employees, with 600k+ beneficiaries.

- Development of RESTful APIs and SOAP services with Spring Boot, Spring MVC, Spring Data and Quarkus, applying SOLID and design patterns
- Implementation of microservice architectures that raised system scalability by 60% and cut maintenance costs by 35%
- Java 8 and Java 11 development with Streams, lambdas and concurrency APIs
- Data access to SQL Server, PostgreSQL, MySQL, MongoDB and Cassandra with JPA and Hibernate
- Delivery of 15+ projects to production with 100% compliance to requirements, working with development, QA and infrastructure teams
- Integration of RabbitMQ and Kafka for asynchronous communication between services
- Continuous integration with Git and Azure DevOps, contributing to CI/CD pipelines, and automated tests with JUnit and Mockito
- Development in C# and ASP.NET, and frontends with React.js, Next.js and TypeScript
- Technical leadership of teams under Agile methodologies
- Construction of MCP (Model Context Protocol) integrations connected to Azure, and use of Claude Code and Codex for code generation, pull request review and static analysis of legacy code

QWControl, QW Software (Grupo Vernet) **Mar 2022 - Nov 2024**

Full Stack Developer Brasília, DF

QW Software builds QWControl, a commercial workload automation platform with workflow orchestration, SAP integration and operational monitoring for mid-size and large clients.

- Maintenance and development of the platform with Java, Groovy, Grails, Quartz and Oracle, modularizing the system under the MVC pattern
- Technical lead of the modularization that split the single codebase into independent Grails modules and plugins loaded by the core, with 1,600+ commits since 2022
- Development of 50+ custom plugins that integrate the tool with SAP R3 (job creation and monitoring), NetBackup, SQL databases, legacy systems and SFTP, FTPS and z/OS file transfer, cutting the execution time of operational tasks by 40%
- Development of the VMware dashboard, the daily job monitoring board and the Rule Flow visual editor with Vue.js and TypeScript
- Lead of multidisciplinary teams of up to 5 developers, under Agile methodologies
- Redesign of the infrastructure around containers, clustering, high availability and load balancing
- Contribution to CI/CD and DevOps automation with Gradle and Docker

IDVLab (Grupo Vernet) **Feb 2022 – Nov 2022**

Systems Analyst Brasília, DF

IDVLab builds monitoring and IT infrastructure solutions for physical and digital environments with IoT.

- Development of server room monitoring dashboards in Node-RED, with gateways sending data over MQTT
- Maintenance of the monitoring sites and new monitoring screens built to client requirements

Tribunal de Contas da União **Oct 2021 – May 2022**

Intern Brasília, DF

- Development and maintenance of Oracle Apex applications with JavaScript, SQL and PL/SQL, for the federal audit court

contract work

Prodesp **Nov 2023 – Jan 2024**

Developer Remote

Prodesp is the data processing company of the state government of São Paulo.

- Development and maintenance of a Visual Basic application that records the current user of each machine for the Snow agent inventory
- SQL Server queries that remove duplicate inventory data, improving the accuracy of the process

DATASUS / Fiocruz (FIOTEC) **6 months**

Software Engineer, consulting Remote

DATASUS is the IT department of Brazil's public health system, SUS. FIOTEC is the support foundation of Fiocruz.

- Study and evolution of the Java 8 and Spring Boot backend architecture of the RNDS (national health data network), focused on modularization, scalability and maintenance
- Technical proposal to migrate the environment from Java 8 to Java 21, and update of the architecture wiki on modular microservices and integration patterns
- Elasticsearch for search and indexing of data at scale, and support in structuring AWS environments for scalability and resilience

DataCore Solutions **6 months**

Backend Developer Remote

DataCore builds integrations and large-scale data processing for telecom and services clients.

- Spring Batch jobs on Java 8 and 11 processing 5 million+ invoices per day for Vivo, Oi and Carvajal, with 30% less processing time
- REST services with Python and Django, React interfaces, PostgreSQL and MySQL, code review on Bitbucket and Agile teams on Jira

skills

Programming languages	Java, Groovy, Kotlin, Python, C#, TypeScript, JavaScript, Rust
Backend development	Spring Boot, Spring MVC, Spring Data, Spring Batch, Quarkus, Grails, Django, Jakarta EE, JPA, Hibernate, RESTful APIs, SOAP, microservices
Frontend development	Vue.js, React, Next.js, Angular, AstroJS, NodeJS, HTML, CSS, Bootstrap, ASP.NET
Cloud and DevOps	AWS, GCP, Azure, Azure DevOps, Docker, Kubernetes, OpenShift, Rancher, Jenkins, Linux, system administration
Databases	Oracle, PostgreSQL, SQL Server, MySQL, MongoDB, Cassandra, DB2, Elasticsearch
Messaging and integration	Kafka, RabbitMQ, SAP R3, MQTT, Quartz

Testing and tools	JUnit, Mockito, Spock, Selenium, Git, GitHub, GitLab, Bitbucket, Jira, Gradle
AI engineering	Claude Code, Codex, MCP, AI-assisted code review, static analysis
Languages	Portuguese (fluent), English (B2)

education

Software Engineering, MBA — **Universidade de São Paulo, Apr 2024 - Present**

Computer Science, Bachelor's — **Centro Universitário de Brasília, 2022 - 2024**

Computer Science, Bachelor's — **Instituto Federal de Brasília, 2019 - 2022**

certifications

- Docker for Beginners
- Spring Framework
- Agile Methodologies
- AWS Educate

notable projects

QWControl modular platform, QW Software - Split a commercial workload automation platform, built on Rundeck, from a single codebase into a core application that loads independent modules and plugins, so each feature has its own build, tests and license check. Java, Groovy, Grails, Gradle. Write-up

VMware dashboard, QWControl - Host and VM state, power operations, hourly metric collection and PDF, CSV and XLSX reports, behind a per-feature license check. Java, Groovy, Grails, Vue.js, vSphere API, Jasper Reports. Write-up

Integration plugins, QWControl - Job steps that run SAP R3 jobs, NetBackup policies, SQL scripts and file transfers to Linux and z/OS hosts. Java, Groovy, SAP JCo, JDBC, SSHJ. Write-up

Rule Flow editor and daily job monitoring, QWControl - A visual editor that runs job steps by rules and conditions, and a board of the day's plan with per-job actions. Vue.js, TypeScript, Vue Flow, Groovy, Quartz. Write-ups

Invoice processing, DataCore Solutions - Spring Batch pipelines for 5 million+ invoices per day for telecom clients. Java, Spring Batch, PostgreSQL.

Aetheris, personal project - Native Kubernetes client for the GNOME desktop. Rust. Write-up
