summary

Software engineer with 5+ years of fullstack experience, specialized in Java, Jakarta EE, Spring Boot and Grails. Delivered 20+ RESTful APIs and microservices for high-demand environments, raising system throughput by up to 40%, and cut deployment time by 30% by automating CI/CD pipelines. Builds frontends with Vue.js, React, Next.js and TypeScript, runs cloud-native workloads on AWS, GCP and Azure, and applies AI to the development workflow with Claude Code and Codex, including MCP integrations connected to Azure.

experience

Stefanini Group **Nov 2024 - Present**
Senior Full Stack Developer Brasília, DF

- Developed RESTful APIs and SOAP services with Jakarta EE, Spring Boot, Quarkus and Spring MVC, applying SOLID and Clean Architecture
- Implemented scalable microservices that raised processing capacity by 40% with 99.9% availability
- Optimized access to SQL Server, PostgreSQL, MongoDB and Cassandra with JPA and Hibernate, cutting response time by 25%
- Integrated systems with RabbitMQ and Kafka for asynchronous communication between critical flows
- Automated CI/CD pipelines with Azure DevOps and Git, accelerating deliveries by 30% and reducing deployment errors
- Led unit and automated testing with JUnit, Mockito, Spock and Selenium, raising test coverage by 50%
- Contributed to migrating legacy infrastructure to Docker and Kubernetes
- Built ReactJS and Next.js interfaces with server-side rendering on top of NodeJS and Java APIs, and multi-layer projects in C# and ASP.NET
- Built MCP (Model Context Protocol) integrations connected to Azure that expose internal pipelines and resources to AI agents, and use Claude Code and Codex for code generation, pull request review and static analysis of legacy code

QW Software **Jun 2022 - Nov 2024**
Full Stack Developer Brasília, DF

- Led the modularization of QWControl, a Rundeck-based job orchestrator, into independent Grails modules and plugins, with 1,600+ commits since 2022
- Built the VMware dashboard (host and VM state, power operations, hourly metrics, PDF, CSV and XLSX reports), the daily job monitoring board and the Rule Flow visual editor in Vue
- Developed 50+ plugins that connect the tool to SAP R3 (job creation and monitoring), NetBackup, SQL databases and SFTP, FTPS and z/OS file transfer
- Rebuilt the infrastructure around containers, clustering, high availability and load balancing, and contributed to CI/CD automation
- Stack: Java, Grails, Spring Boot, Groovy, Vue.js, Quartz, Oracle, Gradle, Docker

Prodesp **Nov 2023 - Jan 2024**
Software Developer São Paulo

- Built and maintained a Visual Basic application that records the current user of each machine for the Snow agent inventory
- Wrote SQL Server queries that remove duplicate inventory data, improving the accuracy of the process

IDVLab **Feb 2022 – Nov 2022**

Systems Analyst Brasília, DF

- Developed server room monitoring dashboards in Node-RED, with gateways sending data over MQTT, and maintained the monitoring sites

Tribunal de Contas da União **Oct 2021 – May 2022**

Trainee Brasília, DF

- Developed and maintained Oracle Apex applications with JavaScript, SQL and PL/SQL

skills

Backend	Java, Jakarta EE, Spring Boot, Quarkus, Grails, Groovy, JPA, Hibernate, NodeJS, Python, C#
Frontend	Vue.js, React, Next.js, TypeScript, JavaScript, HTML, CSS, ASP.NET
Data and messaging	Oracle, PostgreSQL, SQL Server, MongoDB, Cassandra, Kafka, RabbitMQ
Cloud and DevOps	AWS, GCP, Azure, Docker, Kubernetes, Azure DevOps, GitHub Actions, Jenkins
Testing	JUnit, Mockito, Spock, Selenium
AI engineering	Claude Code, Codex, MCP, AI-assisted code review, static analysis

projects

Aetheris **Rust**

- Native Kubernetes client for the GNOME desktop

QWControl case studies **Vue, Groovy, Grails**

- Modular platform, VM dashboard, rule flow editor and plugins, with the real interface on fake data

education

Software Engineering, MBA **Universidade de São Paulo, 2025 – 2027**

Computer Science, Bachelor's **UniCEUB, 2022 – 2024**

Computer Science, Bachelor's **IFB, 2019 – 2022**

Languages Portuguese, English

Certifications Docker, Spring Framework, Agile Methodologies, AWS Educate
